SELA straw customer

Re: Letter of Guarantee

Please know that SELA uses only FDA grade material of North American origin in the production of your straws and we do not add any additional components to purchased materials other than FDA grade colorants when colored straws are purchased. All colorants used are also manufactured in North America and are FDA grade. All straws which SELA provides are manufactured in our facility in York, SC and are hence Made in America.

All materials, including colorants, to my knowledge, meet CA Prop 65, CONEG, and utilize no conflict minerals, nor does SELA add any such materials.

Sincerely,
Ronnie Roberts, Pres.
